THE OPERATIONS MANAGER

CONTENTS

Chapter 1	Introduction	1
1.1	Scope	2
1.2	References	2
Chapter 2	Forecasting	3
2.1	Simple exponential smoothing (SIMPLE)	4
2.2	Smoothing linear, exponential, and damped trends (TRENDSMOOOTH)	8
2.3	Introduction to seasonal adjustment	13
2.4	Ratio-to-moving-average seasonal adjustment for monthly data (MULTIMON)	15
2.5	Difference-to-moving-average seasonal adjustment for monthly data (ADDITMON)	18
Chapter 3	Inventory Management	21
3.1	Economic order quantity (EOQ)	22
3.2	EOQ with backorders (EOQBACK)	25
3.3	EOQ with quantity discounts (EOQDISC)	27
3.4	EOQ for production lot sizes (EOQPROD)	30
3.5	Reorder points and safety stocks (ROP)	32
3.6	Supply chain management (DYNAMO)	
Chapter 4	Material Requirements Planning	35
4.1	MRP inventory plan (MRP1)	36
4.2	Period-order-quantity (POQ)	39
Chapter 5	Production Planning	41
5.1	Aggregate production planning (APP)	42
5.2	Run-out time production planning (RUNOUT)	45
5.3	Learning curves (LEARN)	47

Chapter 6 Facility Location	49
6.1 Center-of-gravity method for locating distribution centers (CENTER)	50
6.2 Dimensional analysis	
Chapter 7 Scheduling	53
7.1 Job sequencing for a single work station (SKED1A)	54
7.2 Job sequencing for 2 work stations in series (SKED2A)	56
7.3 Job sequencing for 3 work stations in series (SKED3A)	58
7.4 Critical-path scheduling (CPM)	
Chapter 8 Quality Control	61
8.1 Acceptance sampling (ACCEPTSA)	62
8.2 Control chart for mean and range (MR-CHART)	65
8.3 Control chart for individual observations (I-CHART)	71
8.4 Control chart for percent defective (P-CHART)	73
8.5 Control chart for number of defects (CU-CHART)	75
8.6 Control limit calculator (LIMIT)	78
Chapter 9 Analysis of Waiting Lines	79
9.1 Single-server queues (SINGLEQ)	80
9.2 Multiple-server queues (MULTIQ)	83
9.3 Queuing equations	85
Chapter 10 Exercises	88
