MARK 7365 Introduction to Digital Marketing  
(Spring 2019)

This syllabus outlines the some of the important topics covered through the semester with a tentative schedule. There might be changes in the syllabus depending on the overall progress. Most evaluation dates would not change once the semester starts, unless there is any extreme unanticipated event. Changes in the syllabus will be announced in the class and a copy of the latest syllabus would be found under the syllabus section of Blackboard.

Instructor: Dr. Shijie Lu (713) 743-4560  
Classes: Thursday, 6:00 to 9:00pm, Melcher Hall 126  
Office: Melcher Hall 385B (third floor, marketing department)  
Office hours: Thursday 2:00 to 3:00pm, or by appointments  
Course website: Blackboard  
Prerequisite: Fundamental course in Marketing/Advertising (e.g. MARK 6361). The course structure and topics assume you have gone through some basic marketing class previously  
Preferred contact: slu@bauer.uh.edu (Please use the email for communication. I will get back to you as soon as possible. Please do not leave voice messages on my office phone.)

Course Description and Objectives
Companies are increasingly shifting some of the marketing efforts to digital technologies such as search engines, social media and mobile. These technologies influence customers and also have an impact on firm performance. It is important for business students to understand some of these digital strategies and familiarize with some of the technologies underlying them. This course is an introductory graduate level elective course designed to provide insights into some of the marketing strategies using Internet-based (digital) technologies. At the end of the course, it is expected that students will be able to:

1. Be familiar with the concepts, theories, and issues in digital marketing. (This will be done primarily through lectures and assigned readings.)
2. Familiarize with some of the technology underlying these strategies from the perspective of a marketing manager (through readings and lectures)
3. Develop analytical abilities to solve real-life problems (this will be done through the application of the concepts and theory in case analysis)
4. Make independent assessment of digital marketing strategies of companies (through case discussions and assignments)
5. Develop business communication skills and receive feedback from peers/instructor.

The course is a mix of interactive class sessions with lecture/case based discussions and assignments. The course is not designed for specialization in specific area of digital marketing (e.g. Search Engine Marketing, Social Media). Students who are interested in focusing on certain topics such as search engine marketing or social media are recommended to talk to the instructor about their specific interests.
Course Materials

Textbook (optional):
As the digital media landscape moves so quickly, there is no required textbook for this course. All required readings for this course will be uploaded to the Blackboard before the class. If you really would like to have a textbook, I would recommend the following online textbook: eMarketing: *The essential guide to marketing in a digital world* by Rob Stokes and the Minds of Quirk. Fifth Edition. A copy of the textbook (PDF) will be posted on Blackboard under the Readings Section.

Case Pack (required):
A set of five Harvard Business School cases is required ($4.25 each). You can buy directly from the Harvard Business Publishing via this link: https://hbsp.harvard.edu/import/594136

Lecture notes (required):
Lecture notes for each session of the class will be posted the day before the class on Blackboard. Additional press articles, links to videos and other supplementary materials will also be available on the course portal on Blackboard.

Grading

The following table gives you the tentative components you will be evaluated upon and the corresponding percentage distribution.

<table>
<thead>
<tr>
<th>Component</th>
<th>Percentage</th>
<th>Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Attendance &amp; Participation</td>
<td>20%</td>
<td>Individual</td>
</tr>
<tr>
<td>Individual Assignments (1*10%)</td>
<td>10%</td>
<td>Individual</td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>25%</td>
<td>Individual</td>
</tr>
<tr>
<td>Group Case Assignment (4*5%)</td>
<td>20%</td>
<td>Team</td>
</tr>
<tr>
<td>Group Project Presentation</td>
<td>25%</td>
<td>Team</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>100%</strong></td>
<td></td>
</tr>
</tbody>
</table>

The final letter grade will be determined by the total points based on the following table.

<table>
<thead>
<tr>
<th>Grade</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>94+</td>
</tr>
<tr>
<td>A-</td>
<td>90+</td>
</tr>
<tr>
<td>B+</td>
<td>86+</td>
</tr>
<tr>
<td>B</td>
<td>82+</td>
</tr>
<tr>
<td>B-</td>
<td>78+</td>
</tr>
<tr>
<td>C+</td>
<td>74+</td>
</tr>
<tr>
<td>C</td>
<td>70+</td>
</tr>
<tr>
<td>C-</td>
<td>66+</td>
</tr>
<tr>
<td>D</td>
<td>60+</td>
</tr>
<tr>
<td>F</td>
<td>&lt;60</td>
</tr>
</tbody>
</table>

Notes: The grades would be rounded off to the next nearest integer at the end of the semester.

Attendance and Participation

Class participation measures your overall commitment toward this course by monitoring your daily active participation in class or case discussions. The quality of the contributions made during these periods affects the overall participation grade. This component requires both attendance and class participation. Students should e-mail if they will be missing sessions and provide an explanation. If the student called upon is not present, is late, or is not sufficiently prepared to make a contribution to the class discussion, he/she will lose points for class contribution. Attendance is a logical prerequisite for class participation, but only attending all the classes without any participation will also not fetch you the entire points for this component. Please also bring your nametag to every class.
Individual Assignment
One individual assignment must be submitted electronically on Blackboard before 8:00am on the due date listed in the course schedule. The specifics about individual assignment will be posted on Blackboard. As data analysis is an important part of digital marketing, some quantitative exercises are expected in the individual assignment. Assignments not submitted on time but within 24 hours of deadline will receive only 50% of the earned grade. No credit will be given 24 hours after the deadline.

Group Case Assignments
The objective in forming groups in this course is to enhance problem solving and nurture teambuilding skills. Groups will be formed voluntarily on Blackboard before the third week of the semester. Each group will consist of 4-5 students, depending on the class size. You will work with your group for case assignments and group project.

Cases used in this course have been carefully selected to provide up-to-date material on the digital media landscape. The purpose of the cases is to provide students an opportunity to learn about marketing by placing themselves in a wide variety of actual situations encountered by marketing professionals and executives.

All students are expected to read all the cases and think about the questions assigned by the instructor before the class discussion. Please see Appendix B for assigned case questions.

There are in total five case sessions in this course. One case titled “Measuring ROI in Sponsored Search Ads” will be used for in-class exercise. For the remaining cases, the deliverable of each group case assignment is a PowerPoint deck. The slide deck should be no more than 8 pages, including the title page and exhibits. A recommended format will be to start with one page summarizing case background, followed by 3-5 pages of your answers/analyses to assigned case question, and one conclusion page.

Each group should submit their case assignments on Blackboard by 8:00 am, the day of the case class. The quality of the slide deck will be evaluated based on the understanding of the case background, the depth of analysis and thinking, and the feasibility of recommended solutions. A rubric for evaluating case assignment is given in Appendix C.

In each case session (except the one without assignment), the instructor will open with a few remarks, then randomly pick one group to “open” the case discussion by presenting their analysis, followed by a class discussion moderated by the instructor. The presentation should be no longer than 20 minutes. The group that has presented before is less likely to present again in future case sessions. But be prepared to present twice throughout the semester. The case presentation will not be graded separately. However, a sign of lack of preparation will negatively affect an individual’s participation score.
Group Project

The same group formed for case presentation will also work on a semester-long group project. The group project is to develop a digital marketing plan for a real firm. You can choose either the firm assigned by the instructor or a firm of your choice. You will play the real-world role of marketing consultants and will have a very short period of time to synthesize, interpret and recommend a viable digital marketing strategy and plan. All class teams will be competing against each other to win the assignment with the client.

Do not choose

- Very large companies such as Apple, Google, Amazon, Coca-Cola, etc. These large companies tend to have complex business strategies that would be beyond the scope of this group project. Preferably please choose medium- or small-sized companies where you would be able to focus on a few (possibly unique) strategies that make them successful.

Deliverables

- The final deliverable of the group project is a 15-minute presentation followed by 2-minute Q&A at the end of the semester. All team members must participate in some way in the presentation. Please email the slide of your presentation to the instructor by 8:00 am, the day of the presentation. The page limit for the slides is 15, including the title page and exhibits. Anything beyond the page limit will not be read.

The final group project presentation is recommended to include the following pieces:

- **Background & Status Quo**: choose a firm of interest and identify this firm’s primary marketing objective or key challenge given its background. Then summarize the firm’s current digital marketing efforts based on knowledge learned from this course

- **Marketing Research**: determine whether the firm’s digital marketing practice matches with its overall marketing objective. Identify one to two of the firm’s digital marketing tactics which you recommend revising or strengthening. For example, you might conclude that a firm should invest more in SEO, or to engage with customers more actively on social media. Please collect a certain amount of empirical data to back up your arguments.

- **Recommendations**: given the identified problems and the results from your analyses, propose your digital marketing strategy and tactics and elaborate how to implement the proposed tactics using available tools, techniques, and platforms from Internet, social media and mobile. Finally, please define metrics that the firm should constantly monitor for evaluating the performance of your tactics in line with the firm’s objectives.

Evaluation

The group project presentation will be evaluated by students from other groups (half weight) and the instructor (half weight) based on the quality and rigor of your thinking, cohesion, comprehension and clarity. Please see Appendix D for the grading rubric for the group project presentation.

Group members will also be asked to assess each of their team member’s contributions. This peer assessment will be used to determine the final score of each team member on the group project.
assignments, including the final group project presentation and the group case assignment. Please see Appendix E for the peer evaluation form.

**Exams**
The midterm exam is a close-book and close-notes exam. It consists of multiple choice questions (about 70 points) and short answer questions (about 30 points). Some of the questions may involve quantitative analysis. Details on exam format and sample questions will be provided in the review session. Dates of the exam are provided in the course schedule.

Inform the instructor in writing (e-mail is fine) of any legitimate exam conflicts at least one week in advance. If the instructor does not receive written notice at least one week before the exam, you will not be given the opportunity to take it at another time. If you miss the exam due to illness or injury, a make-up will not be scheduled for you unless the instructor receives a letter from your doctor (on letterhead) indicating the date and time of the medical problem that prevented you from taking the test. You are responsible for contacting the instructor concerning missing an exam as soon as possible, preferably before the exam.

**General Class Conduct**
These are the expected conduct for maintaining the decorum of the class:

- Use of laptops (or other gadgets) is fine for note taking, but not for activities (listed above) or any other activity that might distract not only you, but also your neighbors from participating in the class.
- Please avoid walking in late or walking out early – if you need to do so, enter/exit do so with minimal disruption to the fellow students.

**Academic Honesty Policy**
The University of Houston Academic Honesty Policy is strictly enforced by the C.T. Bauer College of Business. No violations of this policy will be tolerated in this course. A discussion of the policy is included in the University of Houston Student Handbook which can be downloaded at [http://www.uh.edu/provost/policies/honesty/](http://www.uh.edu/provost/policies/honesty/). Students are expected to be familiar with this policy.

**Special Needs**
The C. T. Bauer College of Business would like to help students who have disabilities achieve their highest potential. To this end, in order to receive academic accommodations, students must register with the Center for Students with Disabilities (CSD) (telephone 713-743-5400), and present approved accommodation documentation to their instructors in a timely manner.

**Availability of Counseling Services**
Counseling and Psychological Services (CAPS) can help students who are having difficulties managing stress, adjusting to college, or feeling sad and hopeless. You can reach CAPS ([www.uh.edu/caps](http://www.uh.edu/caps)) by calling 713-743-5454 during and after business hours for routine appointments or if you or someone you know is in crisis. Also, there is no appointment necessary for the “Let's Talk” program, which is a drop-in consultation service at convenient locations and hours around campus. [http://www.uh.edu/caps/outreach/lets_talk.html](http://www.uh.edu/caps/outreach/lets_talk.html)

Appendix B: Case Questions

Notes. Several cases involve data analytics. Please become familiar with the data uploaded on Blackboard before class discussion

Case 1: Thunderbird
1. Identify Thunderbird key metrics and define the KPIs.
2. Generate tables and graphs, and provide a summary of the main observations, inferences, and potential extrapolations offered by the data.
3. Conduct an evaluation of the each of identified KPIs and then group them according to each marketing goal. Identify gaps and opportunities based on the KPI grouping exercise.
4. Provide a set of recommendations to improve the online performance of Thunderbird.

Required reading: Excel Pivot Table Tutorial (link to video, 6 mins)

Case 2: Measuring ROI on Sponsored Search Ads
1. Please see the question at the end of the case

Case 3: Rocket Fuel
1. Was the advertising campaign effective? Did additional consumers convert as a result of the ad campaign?
2. Was the campaign profitable?
3. How did the number of impressions seen by each user influence the effectiveness of advertising?
4. How does consumer response to advertising vary on different days of the week and at different times of the day?

Case 4: “Pull” and “Push” Social Media Strategies at L’Oréal Paris
1. Among the three styles (ombre, tie-dye or splat) that consumers were researching online, which was most promising for the development of a new product?
2. How to create and market the new product. Should it focus on the professional or consumer-at-home market? How should the product be branded? How should it be priced?
3. Which type of campaign should L’Oréal choose? A traditional marketing campaign, a 100% social media campaign, or a mix? If a mix, how should they be integrated?
4. Should L’Oréal adopt distinct strategies to launch the product in different countries? If so, how distinct?

Case 5: Customer Analytics at Bigbasket – Product Recommendations
1. What is the difference in the recommender system requirements between Bigbasket and other e-commerce companies such as Amazon and Flipkart?
2. What are the different types of recommender systems? Which recommender system is more appropriate for Bigbasket?
3. What are the possible data challenges in developing any analytical model? What approach should be taken to resolve these data challenges?

4. How do we find similarity between products based on what customers buy in different baskets? Can collaborative filtering be used to find similarities?

5. What are the challenges and recommendations in implementing a real world version of “Smart Basket” and “Did you forget” use case?
## Appendix C: Case Assignment Grading Rubric

Each aspect of the case assignment is rated based on the following criteria:

- Level 4 = Excellent = 25 points
- Level 3 = Good, achieved = 20 points
- Level 2 = Fair, still evolving = 15 point
- Level 1 = Poor, still developing = 10 point

<table>
<thead>

| Contents                                                                   |        |        |        |        |
| Was the key marketing objective clearly identified in the introduction?    |        |        |        |        |
| Was the objective relevant to the focal firm?                              |        |        |        |        |
| Did speakers conduct solid and comprehensive research on the firm’s existing digital marketing effort? |        |        |        |        |
| Did speakers provide sufficient evidence-based analyses?                   |        |        |        |        |
| Were the analyses necessary and logically related to their recommendations? |        |        |        |        |
| Did speakers recommend inspirational and creative ideas?                   |        |        |        |        |
| Were those recommendations likely to provide a competitive edge to the focal firm? |        |        |        |        |
| Did speakers propose relevant metrics to evaluate the success of recommended strategies? |        |        |        |        |

Additional comments: (2-3 things you like BEST and/or LEAST about each presentation?)
Appendix E: Group Effort Peer Evaluation Form

Your Name: _________________________  Your Group Number: ________

To evaluate individual contributions to team efforts, including both the group case assignments and the final group project, I am asking everyone to provide a candid evaluation of their teammates. Please think carefully about the assignments you and your teammates have worked on before answering the below. Please submit an electronic copy of your peer evaluation form through Blackboard before the last class on 4/25 (Th).

For each teammate on your team, indicate whether they pulled their share of the load. If so, give that teammate 100 contribution points. If a teammate did not pull his/her share of the workload, give that teammate an amount of points that represents how much of a fair share they are pulling. For example, if you think a teammate is doing about 90% of what he/she should be doing, then give him/her 90 points. I expect that most teams will be functioning well and that most teammates will receive 100 points. However, if a teammate has consistently underperformed, then indicate it so that individual evaluations can be adjusted. For any underperforming teammates, please provide comments that describe the nature and extent of the problem.

Please do NOT rate yourself.

Teammate Name: ________________  Contribution Points ________
