

New Course for Spring 2026:

GENB 7A97 Ace Your Job Search

Session 3, Thursday 4:00-5:30 pm

Did you know the top skill employers hire for is critical thinking?

The so-called “soft” or “professional” skills are the top of mind for hiring managers as they seek out the most effective job candidates to hire or promote from within.

Ace Your Job Search is not your typical job search course. This elective focuses on developing the *critical professional skills* that set you apart from other job candidates and give you an edge on the competition. You will also learn how to highlight these capabilities during networking, interviewing, and as part of your personal brand. Coupled with lectures, you will be in an experiential environment where you can expect to learn by doing.
